

## LEVEL 1 · CHALLENGE

# Look Up

*Decode where the signal came from.*

*The first page of Francis Benoni's notebook is a wall of gibberish. At the bottom, underlined twice: "this is where it came from — but first reaches you."*

The night he vanished, Francis was on the NAC rooftop at IIT (ISM) Dhanbad, at exactly 04:30 IST on 9 October 2026. Each line below decodes to a point in the sky as seen from there, at that moment. Six lines, six stars. Find them, then let the clue tell you how to order what you find.
