# Star Letters

*Every star remembers the name of its home.*

*The next page is nothing but a list of stars, grouped into four clusters. In the margin, Francis wrote: “every star remembers the name of its home, and the Greeks numbered them by brightness.”*

Each entry is a star in Bayer designation form — a Greek letter followed by its constellation. Each cluster of stars spells one word. Decode all four.

```
Alpha Persei, Gamma Orionis, Alpha Cygni, Alpha Tauri, Gamma Aquilae, Gamma  
a Lyrae, Beta Geminorum  
Gamma Leonis, Alpha Fornacis  
Delta Bootis, Alpha Herculis, Beta Persei  
Gamma Andromedae, Delta Lyrae, Beta Cygni
```

Flag format: **CTC{four\_words\_separated\_by\_underscores}**
